

G35

Compact Generator for Diesel Electric Drive.

Industry standard communications protocols SAE J1939 (US) and CAN Open (EU) are implemented to accommodate the widest possible application base and enable the use of both COTS and MOTS components

Magnet-Motor's 240kW G35 generator is the basis of a powerful, state-of-the-art prime mover for fully hybridized military or heavy duty commercial vehicles.

With the addition of advanced electronic controls and software, a complete turnkey system is available.
