

G40.

Integrated Starter Generator for Medium- and Heavyweight Vehicles.

An inlet temperature of 60 °C allows for an even higher power rating of 220 kW, giving any hybrid vehicle a decisive technological edge.

Magnet-Motor's Integrated Starter Generator (ISG) G40 is especially designed for medium- and heavy-weight vehicles with a requirement for additional onboard and exportable electric power.

As a generator, it offers a continuous power rating of 160kW. It also operates as an electric motor of starting the diesel engine and providing additional boost to the drivetrain using power from the battery.
